# Moreton-in-Marsh Dental

Dr Caroline Bell recently made the decision to set up her own dental practice in Moreton-in-Marsh, Gloucestershire .

“We decided on the A-dec 400. Our patients have commented on how comfortable the chair is: they love it! In fact, I think patients love being in a new surgery because it gives them the confidence that they are in the safest hands. Similarly, I think the whole team benefits from having a new working space – it invigorates them and has a huge influence on their working attitude. I know I certainly come to work feeling proud of the space we have created!”

Moreton-in-Marsh Dental - Caroline Bell

# Southfield Dental Practice

“My surgery is very minimalistic. There’s not a lot of equipment on show, just the chair in the middle of the room; the chair-side delivery and suction systems are all tucked away. My wife, in particular, was very keen to make a practice that would be welcoming for those patients who suffer from dental anxiety.”

Dr Christian Gollings decided on an A-dec 400 and LED light. “I knew from the start I wanted to use A-dec. I’ve used their systems before and found them to be simple, cost-effective and good quality – which is ideal for my practice. They also offer a wide range of options on delivery systems, so I was able to choose something that synergised with the way I like to work. My patients like the chair too – and often comment on how comfortable it is.”

Southfield Dental Practice - Christian Gollings

## Coleman & Associates Dental Practice

Coleman & Associates Dental Practice is in an old Georgian building in central Cirencester. Taking the practice over from his father, Dr Robert Coleman decided to completely refit the surgery from the ground up.

“We also chose an A-dec 400 chair with seamless upholstery and a wall mounted LED light. Having used an A-dec chair in my own surgery for the last eight years, I knew that I wanted to have one installed in the new surgery too. My patients are always very positive about my chair and regularly comment about how comfortable they find it – which is enough of a recommendation for me!”

Coleman & Associates Dental Practice - Robert Coleman

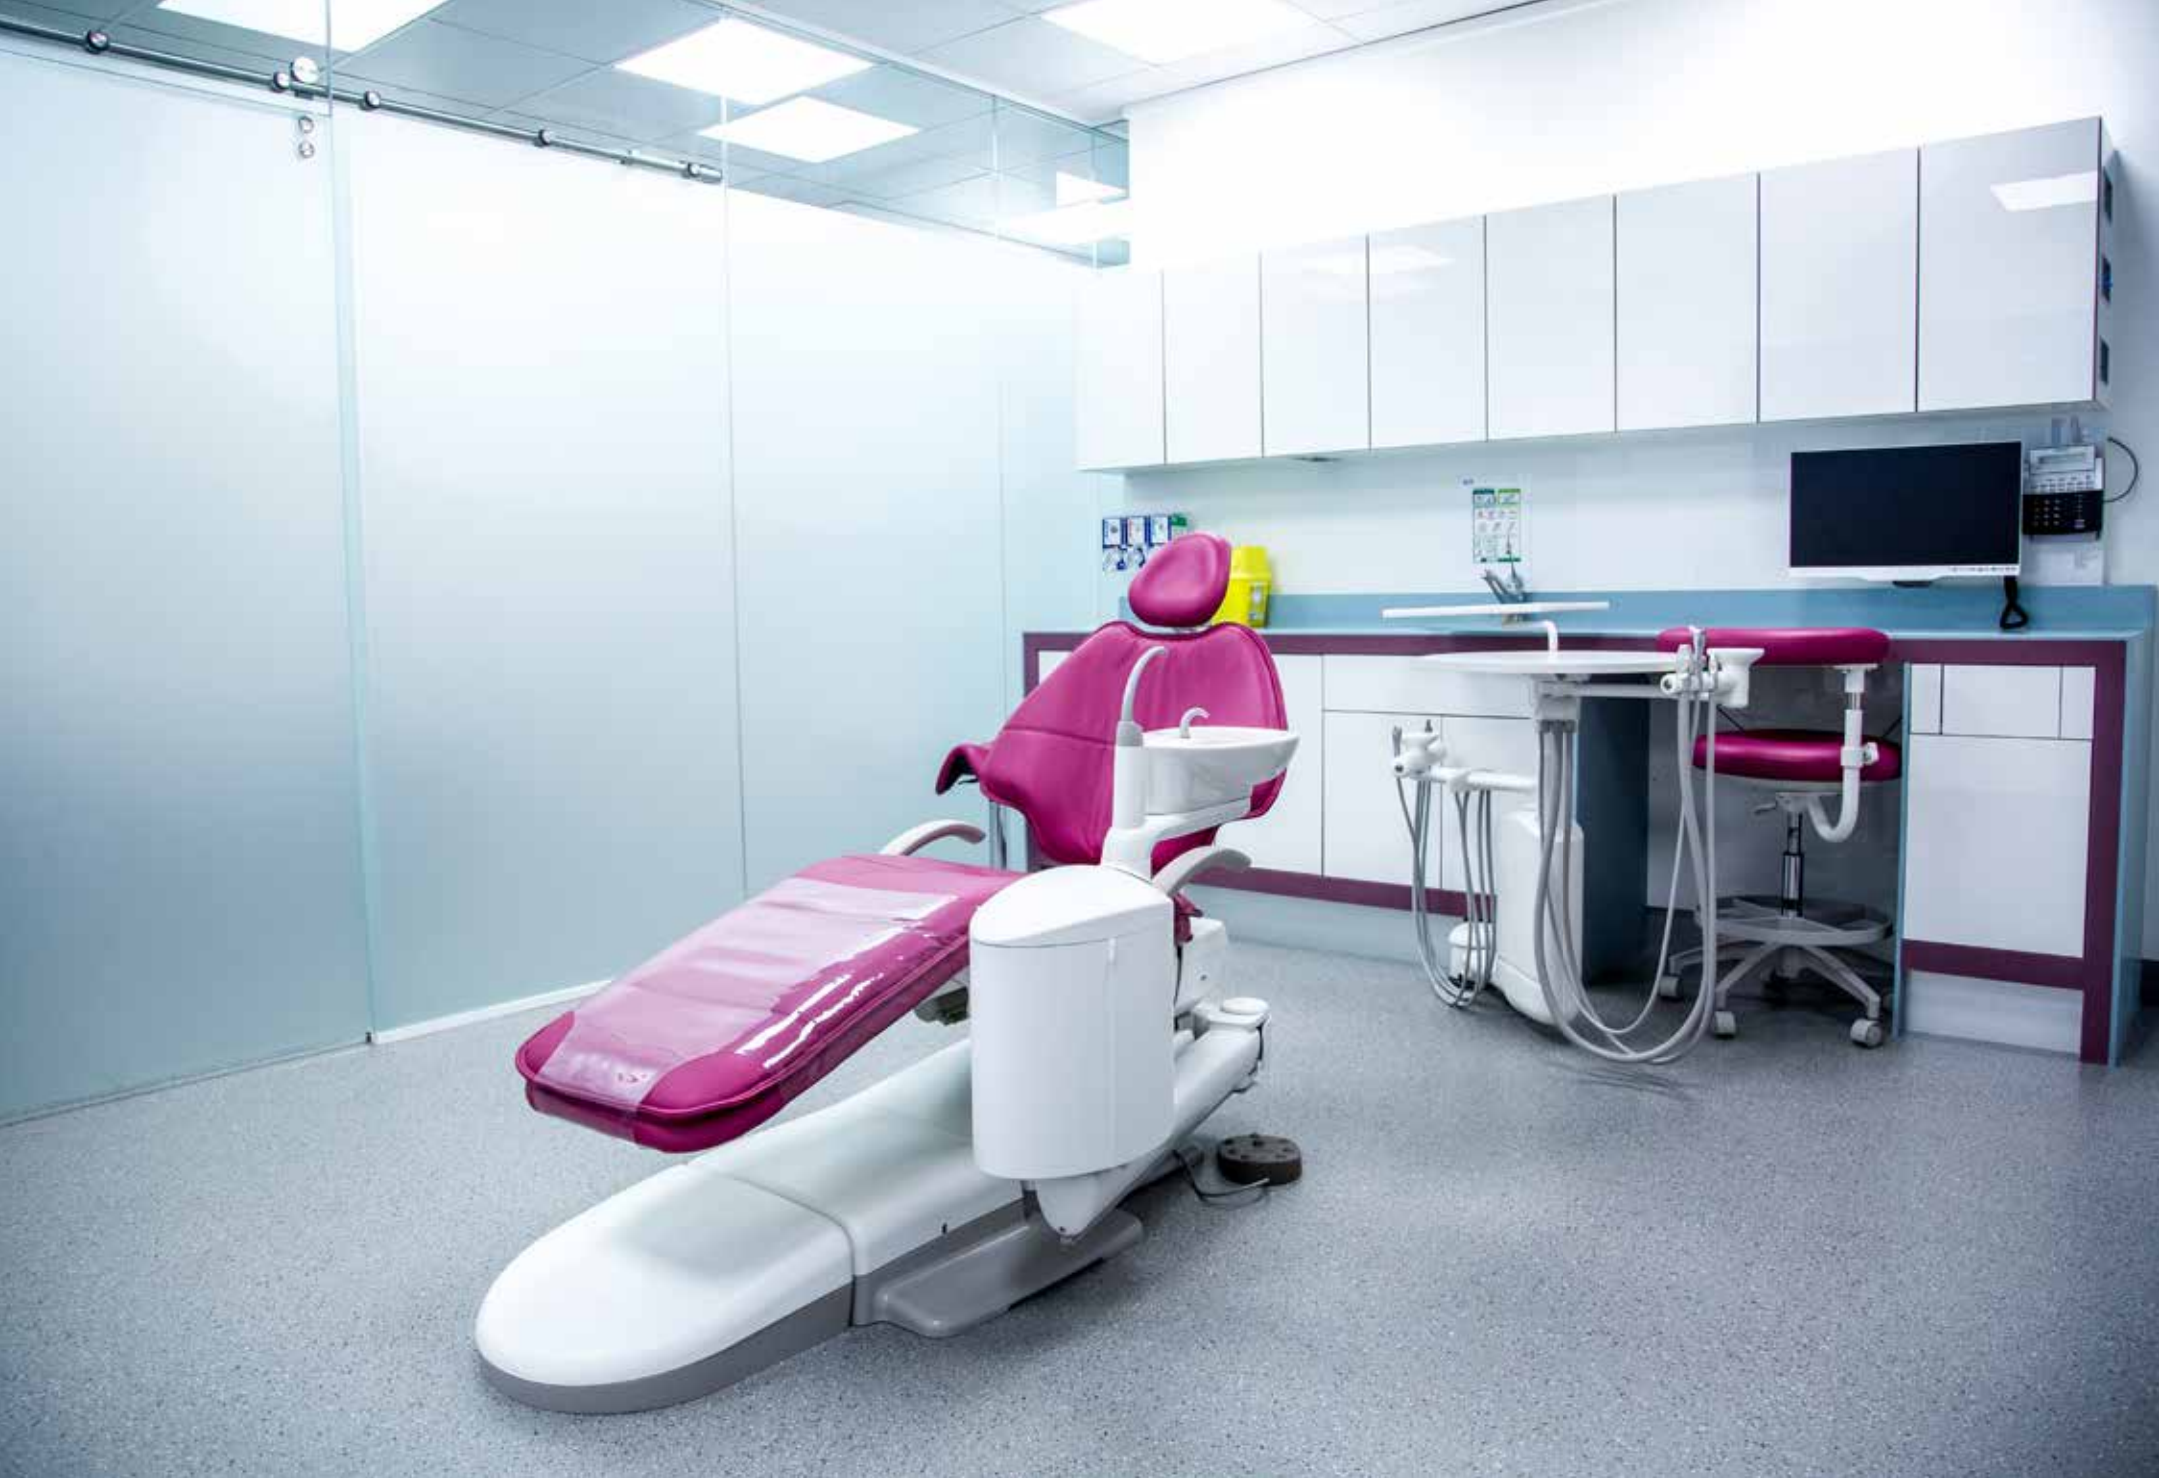

## Pure Orthodontics

Dr Monica Reinach runs the Essex-based specialist orthodontic practice, Pure Orthodontics, and is recognised as the number one provider for Invisalign in the UK.

“We had a very clear vision of what we wanted. We needed a clean, modern environment. This style took a great deal of work to achieve and remains one of the most striking elements of the practice.”

To fit this modern aesthetic, Reinach chose two new A-dec 500 chairs. “These are perfect for private practice and provide the kind of luxury that we have tried to achieve throughout Pure Orthodontics. Our patients love them and I have had nothing but good experiences with them in the past.”

Pure Orthodontics - Monica Reinach

## Yorkshire Dental Suite

Dr Abdul Dalghous says, "In terms of the equipment in the new surgeries, I wanted to use the best – which is why I chose A-dec! Having used A-dec chairs in the past, I knew I wanted to use their products in the Yorkshire Dental Suite. The chairs are some of the very best available: they're functional, reliable, they look great and they are real value for money."

I chose the A-dec 500 chair package for each of the three new surgeries – completely top of the range, with the continental delivery system which is just fantastic. In fact, these chairs are simply excellent. I love working with them and my patients find them very, very comfortable to sit in – even for longer treatments like dental implants."

Yorkshire Dental Suite - Abdul Dalghous

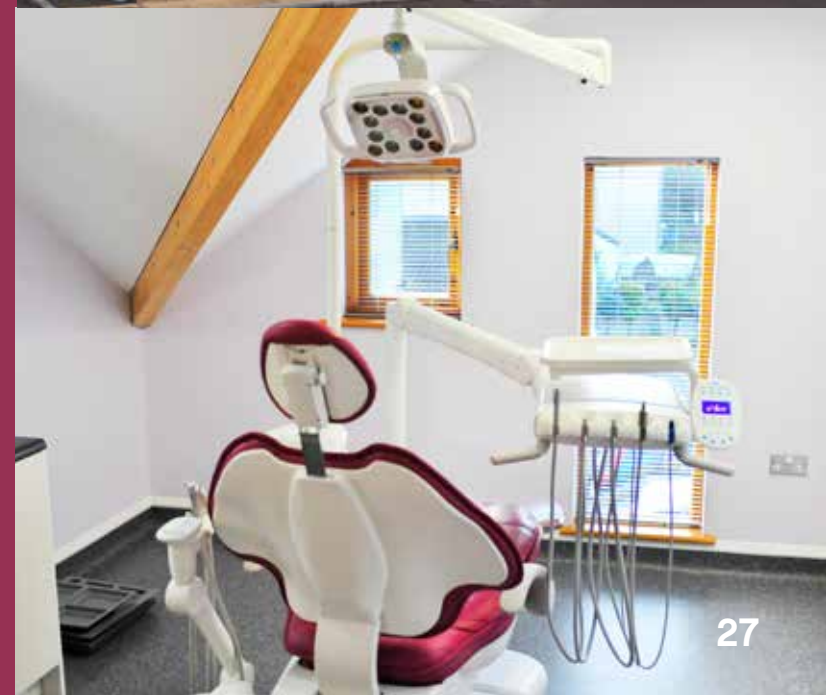

## ■ St Michael's Dental Surgery

Dr Calum Macpherson wanted to create a vibrant space, so chose a bright colour scheme that ran throughout the final surgery. He says, "We settled on a fuchsia pink for the splashback of the sterilisation area and continued the colour scheme to the new chair.

All of our chairs are A-dec. We chose the top-of-the range A-dec 500, which we installed in each of the surgeries, along with electric micro-motor units. I've since found each of my three A-dec chairs to be robust, comfortable and fantastically reliable. Patients really do comment on how comfortable they find the chairs – without prompting! This is incredibly important to us, since we have a significant number of patients who are obliged to remain in the chairs for

## Kennedy Orthodontics

Kennedy Orthodontics is one of the largest specialist practices in Northern Ireland. The team is led by Dr David Kennedy.

“Kennedy Orthodontics have chosen A-dec for all three of our clinics in N. Ireland. We chose the A-dec 300 dental chair with the A-dec 500 LED operating light and associated cart system. The multiple colour options have allowed us to co-ordinate with our brand colours. We were recommended A-dec when we were looking to purpose build our original clinic. 10 years later and A-dec are still our first choice for equipment.”

Kennedy Orthodontics - Dr David Kennedy

## Colomberie Clinic & Dental Practice

Dr Daniela Machado, practice principal and dentist, opened a new dental and wellness clinic on the island of Jersey – Colomberie Clinic & Dental Practice.

“We selected the equipment we wanted, including A-dec chairs. It was among our easiest decisions to make, based on the quality of A-dec’s equipment compared to its competitors. We wanted a minimalistic approach using the tub and tray system, more to the understated American style, and A-dec is an excellent fit. Our patients adore both our A-dec chairs and regularly comment on how lovely and relaxing they are to sit in. From this resoundingly positive, satisfying experience with the chairs, we will definitely install either an A-dec 400 or A-dec 500 when we open surgery 3 in the future.”

Colomberie Clinic & Dental Practice - Dr Daniela Machado

# Rothley Dental

"A-dec simply makes fantastic chairs," Says Dr Simon Chard. "We chose the A-dec 500 side delivery chairs upstairs, and they are great; the units have chair-mounted cuspidors and LED operating lights, which provide an excellent level of lighting. They also really help keep the clinical area looking very clean and clear, as the sidearm delivery systems are stored below the cabinetry, giving full access around the chair."

The detailed handover A-dec gave us even helped with the downstairs surgeries as they knew a lot about our existing chairs and could help us make better use of them. We would highly recommend A-dec, the quality of its products is obvious. The clean lines of the design are continued with the Intrafit cabinetry. In white, with solid surface worktops, it looks excellent, and the way it has been fitted really makes the best use of the space."

Rothley Dental - Simon Chard

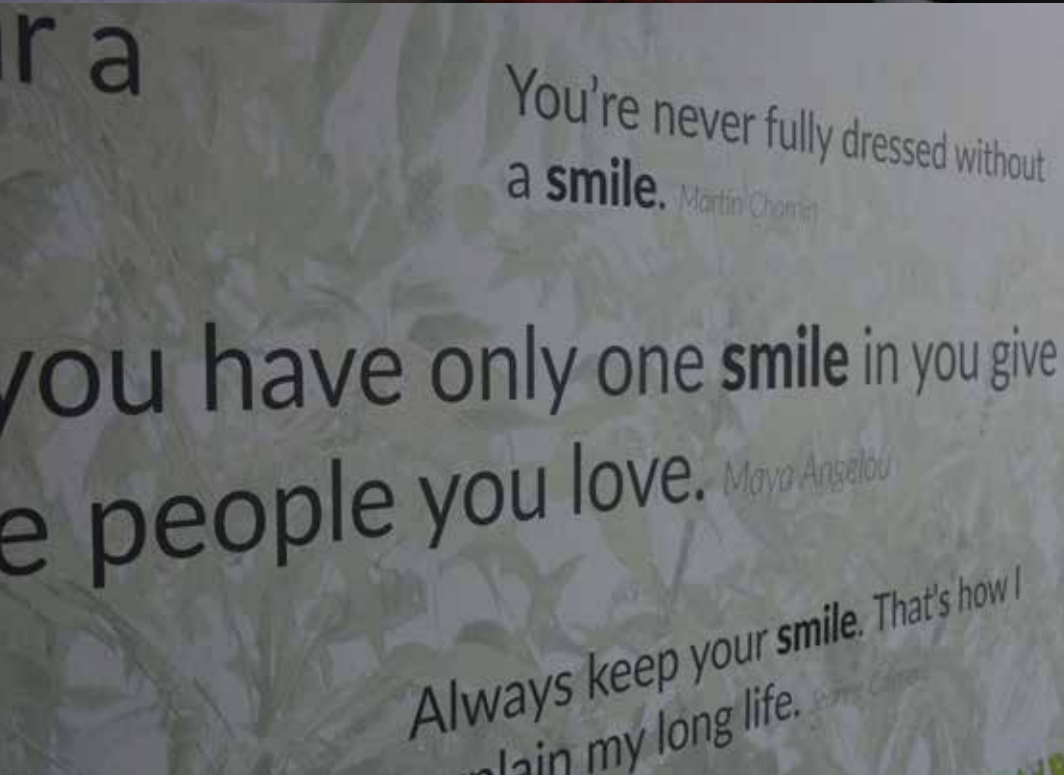

## ■ The Neem Tree Dental Practice

Smita Mehra is the founder of The Neem Tree group of dental practices in London.

“I have purchased around ten A-dec 500 chairs now as I have been so happy with them; they are very robust, high quality, luxurious, slim-line and extremely stylish. Plus, they are definitely durable – I believe I had one of the first A-dec 500 units in the UK in 2004 and, although it is very well used, it still looks great!”

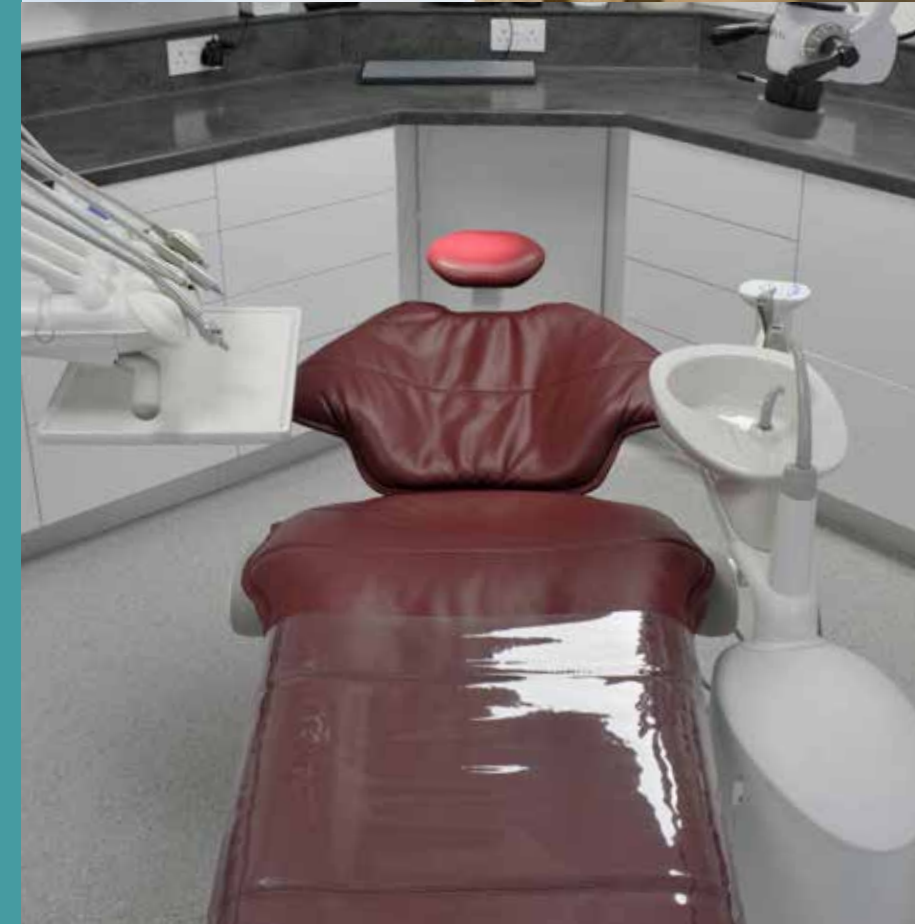

## Bath Dental Clinic

Dr Paul Wilson's new specialist dental practice, Bath Dental Clinic, is situated in a classical Victorian building built in 1887, right in the heart of Bath. Many steps were taken to convert the space into a contemporary specialist dental practice, with the aim of a patient-focused layout, to create a very calm and gentle environment that also stayed true to the heritage of the building.

"We chose the A-dec 500 – firstly because we wanted the very best and, secondly, because as this is the first time I have been a practice owner, I wanted a chair I could trust to last."

# Hilton Dental Care

Dr Jatinder Dhadli worked with the experts to set up a new, custom-built private dental practice in Hilton, Derby.

“When it came to the chair, I knew I wanted to work with A-dec. For the past four years I have been using an A-dec chair and was keen to continue doing so as I had become accustomed to their reliability and ease of use.

In the end, we chose the A-dec Performer – because it’s reliable, aesthetically pleasing and ergonomically designed. We also wanted to have an ambidextrous system that allowed us to quickly and easily reconfigure the chair for different users and the A-dec Performer allowed us to do so. What’s more, our new patients love the chair – they always comment on the colour, which we chose to be quite striking, and how comfortable they find it to lie down on. In fact, we have had several patients fall asleep during treatment, although we like to think this is due to the gentle dental care they are receiving!”
