PRODUCT RANGE

# 10 YEARS OF CLINICAL RESEARCH

**Dr. ROSSANA CASTELLANA, MD**  
Dermatologist  
GPQ Chief Scientific Officer  
Italy

## THE SCIENCE OF SKINCARE

“Aesthetic medicine is a treatment of the being and then of the appearance”.

After 10 years of clinical research, my team and I have devised a product unlike any other previously used. Its unique formulation has been deemed worthy of an international patent, already granted in the EU, Australia, Japan and in the USA.

It's marketed under the brand name **PRX-T33**.

Dr. Rossana Castellana

A handwritten signature in black ink that reads "Rossana Castellana". The signature is written in a cursive, flowing style.

**PRX-T<sub>33</sub>**  
 WiQO

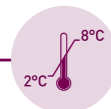

## Features & advantages

### COMPOSITION

Hydrogen peroxide, 33% trichloroacetic acid (TCA), kojic acid, stabilizers.

Due to its unique composition comprising very active formulation, the product must be stored at min +2°C and max +8°C.

### INDICATIONS

- Treats skin elastosis of face, neck and cleavage
- Prevents atrophic scarring
- Treats melasma and post-inflammatory hyperpigmentation

**PRX-T<sub>33</sub> is a cutting-edge patented medical device**, a non injectable biorevitalization treatment to stimulate the skins natural regenerative process.

Its **unique formulation** makes it **non-aggressive** on the epidermal layers, so no frosting is caused, which gives several important advantages: the treatment **can be performed in the summer months too**, it doesn't require interruption of the patient's social life, the **effects are immediately visible** (although the full effect is reached after more than one session, and using the WiQo Cosmeceuticals home care range).

### KEY TOPICS

- Needle-free topical application
- Internationally patented
- Visible results
- No pain, no downtime

### DEMONSTRATION VIDEO

To contact **WiQO's** dermatologists and research biologists for scientific questions or queries regarding our products: [scientificdivision@wiqo.eu](mailto:scientificdivision@wiqo.eu)

The most recent approach to aesthetic medicine is combination of treatments. No single technique is a silver bullet to solve all the problems of a patient.

The synergy of chemical, physical or mechanical stimulation is often the best way to achieve a natural look. Even though the application technique is comparatively simple, PRX-T<sub>33</sub> guarantees visible immediate results, especially if followed by the **WiQo home treatment**. The the needle-free topical application is particularly appreciated by patients who dislike needles.

PRX-T<sub>33</sub> has been on the market since 2012, and has quickly garnered the attention and respect of medical professionals all over the world. The high number of treatments performed with no adverse effects proves its certified safety.

We are proud to say that Universities and Key Opinion Leaders from different countries have spontaneously offered to perform Congress Lectures on PRX-T<sub>33</sub>, wanting to be the first to be associated with our brand.

# PRX THERAPY

## The synthesis of WiQo excellence

PRX-Therapy is WiQo's Home Care Beauty Program specifically formulated to complete the PRX-T<sub>33</sub> treatment in-office.

### COMBINED ACTION IN 3 STEPS

#### 1. BOOST STIMULATION

At the end of each PRX-T<sub>33</sub> session the skin is firmer and brighter. A slight feeling of dryness is normal, due to the exfoliation of the surface layers. The best way to prevent and treat this effect is to apply a generous amount of **WiQo NOURISHING AND MOISTURIZING CREAM FOR DRY SKIN**. Only in case of very thickened skin, intense, visible exfoliation lasting a few days could occur. The phenomenon will lessen considerably in the subsequent treatments. The redness that may occur immediately after the treatment is normal and usually resolves within a few hours.

#### PRX-THERAPY

makes the skin smoother and favours tanning but it also means that the skin is more prone to sunburn, especially fair skins. The use of a high protection sunscreen is essential.

#### INSTRUCTIONS FOR USE

Apply morning and evening and whenever you feel the need.

#### INSTRUCTIONS FOR USE

Apply once a day at least 30 minutes before using any other product. During the first applications, slight tingling and slight redness are normal.

#### INSTRUCTIONS FOR USE

Apply once a day. Apply twice a day to the areas with skin thickening. During the first applications, slight tingling and slight redness are normal.

#### 2. NOURISH AND PROTECT

For healthy, beautiful skin it is wise to make sure it is always well hydrated. Dehydrated skin forms unsightly scales, is more fragile and loses its barrier power, letting in external substances that make it prone to dermatitis.

**WiQo NOURISHING AND MOISTURIZING CREAM FOR DRY SKIN** prevents the skin from drying out and offers it all the nutrients it needs.

#### 3. CONTINUE THE STIMULATION

**WiQo SMOOTHING FLUID** works by lowering the skin's pH, forcing it to restore the natural pH. This natural daily stimulating action is a sort of "exercise" that allows the skin to stay healthy and firm up.

#### PRX-THERAPY BODY

**WiQo BODY CREAM FIRMING ANTI-DRYING** has both a stimulating and a protective action, making it a complete home treatment for the specific needs of the body's skin.

# Fruit Mask

## with natural fruit ingredients

“Doctor, what’s **new** for my beauty?”  
 “**FRUIT MASK** combined with **PRX-Therapy!**”

NEW

FRUIT MASK was born out of the successful alliance between **natural fruit ingredients** (cucumber, strawberries and bananas) and **mandelic acid**.

The important **antioxidant properties of fruits** combined with the mild **keratolytic function of alpha hydroxy acids (AHA)** result in a **firming and illuminating effect**, leaving your skin even more **luminous** and **smooth**.

PRX  
THERAPY

+

Fruit Mask

Combining **Fruit Mask** and **PRX-Therapy** results in enhanced firming, illuminating, and smoothing effect.

### BENEFITS

- Mildly increases the exfoliation of the stratum corneum, **further smoothing** the superficial layers of the skin
- **Smooths** out small wrinkles
- Well tolerated even by **sensitive skins**
- **Flexible** and **safe** leave-on time: can be allowed to act for long periods of time, without the need for removal
- Has an **antioxidant** effect
- Has a **firming** and **illuminating** effect
- It **complements PRX-T<sub>33</sub>** in-office treatment

## PRE TREATMENT

### P solution

---

## TREATMENT

### PRX-T<sup>lady</sup>

### REVERSE BEAEBSE PEEL

---

## POST TREATMENT

### RESTORING CREAM EXTERNAL DELICATE AREAS

### LIGHTENING SERUM EXTERNAL DELICATE AREAS

### REVERSE SERUM LIGHTENING SERUM FACE

## P solution

### INDICATIONS

Skin cleansing before the use of:

PRX-T<sub>33</sub> and other non-injectable biorevitalizers

*Peelings*

*Lasers*

*Fillers*

### PROFESSIONAL PRE-TREATMENT SOLUTION

Formulated with delicate cleansers and calibrated acids, such as:

- Glycolic and lactic acids with exfoliating action
- Lactobionic and citric acids with exfoliating and iron-chelating actions
- Phytic acid with chelating action, which also counteracts lipid peroxidation

### PROS

- It levels the skin pH and reduces the stratum corneum, thus improving the penetration of products applied after its use
- It cleanses delicately, without drying, greasing, or leaving any residue on the skin.
- While removing the epidermal scales, it prevents any possible penetration of makeup residue after needle puncture.
- No rinse necessary.

# PRX-T<sup>®</sup> lady

## INDICATIONS

Gives turgidity and firmness to the skin without damaging the epidermis

*Lightens hyperpigmentation*

For an immediate and long-lasting aesthetic improvement

*Needle-free and painless*

## TREATMENT OF CHRONO-AGING AND HYPERPIGMENTATION OF EXTERNAL DELICATE AREAS, AXILLAE, MAMMARY AREOLA AND PERIANAL AREA

**Intrinsic aging** occurs also in the covered areas and the menopause suddenly worsens its perception. The **Climacterium** is an event that now occurs in the middle of an active life and not – as it happened in the past – at its end. The **active life** consists of all its aspects, including intimacy.

Suggest the PRX-T<sup>®</sup> lady for the intimate parts to your patients and help women with a discomfort that is often difficult to express.

## POST TREATMENT & HOME CARE

### RESTORING CREAM EXTERNAL DELICATE AREAS

Indicated to protect the skin and prevent dryness in delicate areas after outpatient treatments and peelings.

### LIGHTENING SERUM EXTERNAL DELICATE AREAS

Indicated to lighten the hyperpigmented skin of external delicate areas, perianal area, and areola. Can be used alone or after outpatient treatments.

# REVERSE BEAEBSE PEEL

## INDICATIONS

Effective also on resistant or recurrent melasma  
*It can be modulated according to the patient's tolerability*  
 Can be used on all phototypes

## PROGRESSIVE MELASMA RECONDITIONING AND DERMO-EPIDERMAL HYPERPIGMENTATION TREATMENT

Invasive treatments to remove melasma carry the risk of rebound effect (worsening after initial temporary improvement). **REVERSE PEEL** is an effective and safe treatment and consists in 3 phases.

**RsP1** Its action starts with the melanin oxidation, thanks to the hydrogen peroxide, and continues with the lightening action of the kojic acid. Both the substances reach the deeper layers of the dermis thanks to the TCA which allows for an easier penetration.

**RsP2** A peeling with high-concentration lactic acid and phytic acid with iron-chelating action. The lactic acid reaches the basal layer producing cell vacuolization without destructuring the superficial layers.

**RsP3** A peeling made of hydroxy acids (glycolic, mandelic, salicylic) that descale the skin's outer layers and phytic acid with an iron-chelating action.

## NEUTRALISER

It stops the action of hydroxy acid peelings without causing a burning sensation for the patient, thanks to its innovative oil-based formulation with jojoba oil.

## POST TREATMENT & HOME TREATMENT

## REVERSE SERUM

Lightening serum specifically formulated to oppose and prevent skin hyperpigmentation. Its silky texture makes it an easy-to-apply and pleasant product. The dropper allows for a quick and accurate application, directly on the pigmented areas. Apply with a delicate massage until it is absorbed.

## ICP CREAM

When this coloured compact cream is applied in a thin and silky layer, it evens skin tone without highlighting wrinkles. It also camouflages spots, reddening or any other skin imperfections. Its sun protective factor (SPF 50+) offers a wide-range safe protection from UV rays, as well as from visible sun light, preventing photoaging damages. It contains Orchid flower Extract and Vitamin E.

WiQO®  
cosmeceuticals

HOME CARE RANGE

PRX-T<sub>33</sub> can be used to treat a wide variety of indications, as well as in association with other treatments. This is of key importance in the modern practice, where Doctors have to provide solutions to their patients. Physicians can easily position the price of treatments with PRX-T<sub>33</sub> and the WiQo Dermocosmetic Home care range to make it affordable for a wide patient target, even in association with other techniques.

WiQO®  
cosmeceuticals

WiQo Cosmeceuticals home care range has been designed to complement PRX-T<sub>33</sub> and other aesthetic medicine treatments. Giving these Cosmeceuticals to the patient after the treatment reinforces the idea that treatment with PRX-T<sub>33</sub> is much more than a simple peeling.

WiQo's dermocosmetic line was created by a Dermatologist with the aim of offering patients products for the health and well-being of the skin. Because beauty is first and foremost healthy skin. Each of our products is therefore the result of very thorough scientific research and production with high quality ingredients. Maintenance of the skin's health is achieved through a **program** that meets its main needs: **protection, prevention and stimulation**. Its first necessity is **protection** from damage caused by UV radiation, weather, drying and air pollution. The second is **prevention** by supplying nutrients which maintain or restore the hydrolipidic film. The third necessity for the skin is **to be stimulated** to regenerate and keep its trophism, in order to prevent epidermal atrophy conditions, resulting in the development of deeper wrinkles and dermal atrophy resulting in sagging and fragility.

## Our best sellers

### WiQo SMOOTHING FACE FLUID

WIQO SMOOTHING FACE FLUID is a dermocosmetic containing glycolic acid suitable for all skin types, recommended for both young, impure skins, and older skins, even men's, it reduces wrinkle depth.

### WiQo NOURISHING AND MOISTURIZING FACE CREAM FOR DRY SKIN

WiQo NOURISHING AND MOISTURIZING FACE CREAM FOR DRY SKIN provides dry skin with the nourishing principles and protective substances it lacks, leaving it nourished and hydrated. This product is indicated for its protective action on the superficial layers of the skin and on skins altered by chemical peelings or other aesthetic medicine treatments. It is well tolerated even by highly reactive skins.

The NOURISHING AND MOISTURIZING FACE CREAM FOR DRY SKIN and the NOURISHING AND MOISTURIZING FACE CREAM FOR NORMAL OR COMBINATION SKIN, satisfy the requests for protection and prevention since these products are formulated with active ingredients of proven clinical efficacy.

The SMOOTHING FACE FLUID and the FIRMLING ANTI-DRYING BODY CREAM are stimulating products that contain low pH glycolic acid.

The skin has a natural pH of around 5.5. With the application of our stimulating products, the skin's pH is lowered, making it perform a kind of "gymnastics" in order to bring it back to its physiological values. The skin will never get used to this process and therefore, daily application of these products is particularly suitable to keep the skin always "active".

### WiQo NOURISHING AND MOISTURIZING FACE CREAM FOR NORMAL OR COMBINATION SKIN

WIQO NOURISHING AND MOISTURIZING FACE CREAM FOR NORMAL OR COMBINATION SKIN provides normal or combination skin with the nourishing principles and protective substances it lacks, maintaining the skin of face, neck and cleavage perfectly hydrated.

### WiQo FIRMLING ANTI-DRYING BODY CREAM

WIQO FIRMLING ANTI-DRYING BODY CREAM combines the characteristics of WiQo SMOOTHING FLUID and the NOURISHING AND MOISTURIZING CREAM. This product's low pH stimulates an increase in the thickness of the skin, thus combating age-related thinning. Glycolic acid regulates the thickness of the stratum corneum, thus making the skin smoother and encouraging hydration.

### EYE CONTOUR AND DELICATE FACIAL SKIN SERUM

An indispensable ally in **moisturizing eye contour** and **facial skin**, particularly if very delicate.

**The active principles, which include peptides, DMAE** and the **phytotherapeutic complex** comprising plant extracts of butcher's broom, calendula, gotu kola and liquorice, make the serum perfect to **counteract the appearance of bags and dark circles**.

Moreover, it can be used as make up base to be used as a **make-up base**, combined with ICP Cream and as a **"moisturizing touch"**, even multiple times during the day to freshen up your make-up, providing renewed hydration to the coloured powders, which then gradually release water to the skin. Perfect for concealing small wrinkles and imperfections, the serum promotes **continuous hydration**, giving a more **vital, toned and bright appearance**.

Ideal for **all skin types**, the product is dermatologically and ophthalmically tested.

#### MODE OF USE

**Eye contour:** apply a few drops of product to the area around the eyes, in the morning and evening. Individuals with very sensitive skin, or who do not tolerate thick creams, can apply the cream on the entire face as an oil-free moisturiser.

**As a refreshing make-up:** apply a few drops on top of your make-up (ICP Cream) during the day to revive its effect.

SPF 50+  
UVB + UVA

ULTRA LIGHT   LIGHT   MEDIUM

### ICP CREAM INVISIBLE COLOURED PROTECTIVE

**ICP (Invisible coloured protective)** is a **solid coloured cream** with three-fold function: it **hides** small skin imperfections, **protects** the skin from UV and from light in all seasons and provides an **even skin tone**.

**ICP Cream** is an innovative cosmetic: it is easily applied, it forms a nourishing and protective extra-thin film, for silky skin and a natural make-up, thus avoiding the "face cast effect" resulting from applying heavier products.

With its SPF 50+ screen, ICP coloured cream slows down ageing arising from exposure to UVA and UVB sunrays and to natural light.

#### MODE OF USE

Apply with the small sponge provided, spreading it over the face as a thin layer. To deal with blotches and hide small blemishes, apply a thicker layer with your finger on the area of interest, then tap gently to blend it in.

Use eye contour serum as required to keep your skin moisturised during the day and freshen up your make-up.

# WiQO® cosmeceuticals

NEW

## WiQo RESTRUCTURING VITAMIN CREAM ANTI-AGING, ANTI-OXIDANT, ANTI-WRINKLE *Face, neck, décolleté, hands*

A new cosmetic formulation for home use, containing **Hydroxypinacolone Retinoate** and **Vitamin C** to fight the signs of time on the skin. Combats wrinkles and makes the skin visibly tighter and brighter. Indicated for all skin types, especially mature ones.

### ADVANTAGES

- **Significant improvement of wrinkles** in the skin
- **Significant reduction of the number of pores** and of their overall volume
- **Remarkable anti-oxidant activity**

### INGREDIENTS

#### • **Hydroxypinacolone Retinoate**

**Cosmetics containing VITAMIN A (retinol)** help smooth fine wrinkles by toning the skin, but to be effective they need to contain retinol at a high percentage because it is 20 times less potent than retinoic acid, the active metabolite whose use is not allowed in cosmetics in the EU. The cosmetic industry therefore uses various precursors of retinoic acid (retinoids), such as its esters, which must be metabolised by cells in various steps in order to act on specific receptors.

### DIRECTIONS FOR USE

The **WiQo Restructuring Vitamin Cream** must be applied once a day on the face, neck, décolleté and hands, on its own or in an association with other home use products of the WiQo line.

Use for three months, discontinue for three months and then resume the cycle.

The **WiQo Restructuring Vitamin Cream** contains a retinoid called **Hydroxypinacolone Retinoate**, that acts with efficacy directly on receptors, without the need for being modified. Its effects are comparable to those of retinoic acid, without its irritating effects.

Hydroxypinacolone retinoate, in hydro- and lipo-compatible solvent, is a substance with several advantages:

- causes **less irritation** than the well-known retinol, with **higher efficacy**
- has **more anti-aging properties on spots and superficial wrinkles**, tested on face and hands and documented through clinical and instrumental evaluations
- **improves skin texture and smoothness**, reduces scaling and leaves the skin **more luminous**
- remains **more stable** in cosmetic preparations
- is non comedogenic

#### • **Vitamin C**

The other active principle in this product is **VITAMIN C (ascorbic acid)**, which has **notorious anti-oxidant**, brightening and repairing properties. Its powerful anti-oxidant action is expressed through a scavenger effect (it literally works as a "garbage collector" for oxygen's reactive species) and the regeneration of alpha-tocopherol (vitamin E), based on its oxidised form. However, vitamin C is unstable, i.e. it tends to oxidise rapidly. In cosmetics, this often results in a change of colour, an indication of its degradation. In **WiQo Restructuring Vitamin Cream**, the ascorbic acid in high concentration is not present in a water-based solution, but in anhydrous suspension that **prevents its oxidation** and **therefore ensures its stability**.

# WiQO® cosmeceuticals

NEW

## WiQo BALANCING CREAM SEBUM-REGULATING OF OILY AND ACNE-PRONE SKIN

Face

The result of years of research and development, the new WiQo sebum-regulating balancing cream is indicated for the cosmetic treatment of oily and acne-prone skin, with **excess sebum, blackheads and dilated pores**.

Thanks to its specific formula containing Azelaic Acid, Salicylic Acid and Fermented Plant Extracts it reduces sebum excess, minimizes pores appearance and evens out the complexion, for a healthier-looking skin, brighter and visibly more beautiful.

### CLINICALLY PROVEN RESULTS

PORE  
VOLUME  
-38.3%

Improved  
subjects  
100%

NUMBER  
OF PORES  
-32.8%

Improved  
subjects  
95%

SKIN  
SEBUM  
-40.7%

Improved  
subjects  
95%

**DIRECTIONS FOR USE**  
After a careful cleanse, apply the cream on the entire face, once or twice a day. Thanks to the characteristics of its formula, the cream is absorbed immediately - zero grease, plenty of hydration. Improvement can be observed on the entire face and on the pores as early as in the first weeks of use. The cream should be used for at least 50 days.

### ACTIVE INGREDIENTS

#### COMEDOLYTIC

- SALICYLIC ACID
- AZELAIC ACID

#### SEBUM SECRETION REGULATION

- AZELAIC ACID (20%)
- BIFIDA FERMENT LYSATE
- FERMENTED FOLIC ACID

#### SOOTHING

- ADA
- FERMENTED CAMELLIA OIL
- PHYTOSPHINGOSINE

#### VITAMIN E

#### FERMENTED EXTRACTS

- BIFIDA FERMENT LYSATE
- FERMENTED FOLIC ACID
- FERMENTED CAMELLIA OIL

#### NIACINAMIDE

### COSMETIC SCIENCE FOR THE BEAUTY OF A HEALTHY SKIN

We have selected some among the most advanced high-tech cosmetic ingredients, in order to achieve our demonstrated clinical results, including:

- **Micronised azelaic acid** to reduce the factors that cause sensitivity and pimples  
*combined with*
- **Encapsulated salicylic acid**, which reduces excess sebum and blackheads and minimises skin irritations and rashes
- **Three active fermented extracts:** bifida ferment lysate, fermented camellia oil, fermented folic acid
- **Vitamin E and Vitamin B3 (Niacinamide)**
- **Azelamidopropyl Dimethyl Amine (ADA)**, a next generation active principle that has several beneficial effects on impure skin

## WiQo BOOSTER POST-TREATMENT SPRAY A SPRAY SOLUTION WITH A PLUMPING, SOOTHING AND PROTECTIVE ACTION

**WiQo Booster** is a pressurized dermocosmetic spray with high penetration power, specifically designed to boost **skin recovery** after micro-invasive procedures. Its **unique formulation** has a **plumping, soothing and protective action**. When applied immediately after the procedures, it soothes the skin and reduces redness. The continuous use of **WiQo Booster** in your daily homecare will result in a **fresher and plumper skin**.

### METHOD OF USE

Spray **WiQo Booster** evenly on the chosen area; with clean hands, massage the product until its absorption. Apply on the skin immediately after the procedure and in between sessions once per day, for the entire cycle. Continue to apply at home for 7 days after the last session.

**Face:** two sprays, one for each side of the face, massaging the product until its absorption.

**Neck:** one spray, massaging the product until its absorption.

**Décolleté:** two sprays, one for each side, massaging the product until its absorption.

### INDICATIONS

Can be used as a stand-alone product, as well as a post-treatment following micro-invasive procedures, such as:

- Fractional radiofrequency
- Fractional lasers
- Microneedling

### ADVANTAGES

- Immediately soothing
- Reduces redness
- Protective film
- Improves skin tone and elasticity
- Holds water within the skin preventing dehydration

### INGREDIENTS

- Four hyaluronic acids with different molecular weights which play different roles in the skin strata
- Acetylglucosamine
- Biomimetic peptide pool
- Antimicrobial micronized silver (the only preservative used in the product)
